- Definition Of Done (DOD):

- Features are full implemented in the team-chosen language.

- Solid Principles and OOP are applied to the code

- Clean Code

- Task and code are reviewed by senior peer in the team and get accepted

- Code is tested by the Booster Performance tool and the report must be empty of bugs and performance issues.

- Code is Run by the Optimizer and Minimizer tools to reduce the size and optimize memory caching.

- Definition Of Ready (DOR):

- When the User Story is full-detailed and well-described.
- When user story specify accurately the steps of achieving it not just a description so that we can directly turn the user story into predefined tasks then assign them to teams
- Preferred user story written in the manner : As a user >> I want to >> so that >> I can .

  Good Example: As a user I need to sign up with email , username and strong password consists of at least 16 characters contains uppercase, lowercase, digits and symbols so that I can use the all app features and save my history of browsing the app on my account log to resume my previous work on the next login session.

  Bad Example: I need to create account to use the app.
